FOR IMMEDIATE RELEASE

PACIFIC COAST GROUNDFISH FISHERY COMMERCIAL AND RECREATIONAL MANAGEMENT MEASURES FOR MARCH THROUGH DECEMBER 2004

The National Marine Fisheries Service (NMFS) announces management measures for March through December 2004 in the Pacific Coast groundfish fishery off Washington, Oregon, and California, **effective at 0001 hours (local time) March 1 until December 31, 2004**. These management measures were recommended by the Pacific Fishery Management Council (Council); the states of Washington, Oregon, and California will implement similar restrictions. Any discrepancies between this public notice and the *Federal Register* will be resolved in favor of the *Federal Register*.

Changes from the corrected regulations for January-February 2004

- Limited entry trawl and fixed gear vessels are prohibited from drifting within an RCA.
- Boundary coordinates for several of the Rockfish Conservation Areas (RCAs)
- California recreational fisheries- new closure around Cordell Bank
- California recreational fisheries- revised Farallon Island closure to only apply to certain species rather than all groundfish
- California recreational fisheries- lingcod reduced to a 1 fish bag limit and increased to a 30" minimum size limit beginning April 1

Overview

The Council has recommended again using closed areas, including depth-based management in 2004 (see "Commercial Fishery: Time and Area Closures" and the "Recreational Fishery" section below). The groundfish conservation areas include three different types of closed areas: the rockfish conservation areas (RCAs), the yelloweye rockfish conservation area (YRCA), and the cowcod conservation areas (CCAs). The RCA boundaries, depth-based boundaries marking large closed areas, implemented by NMFS have been somewhat modified from 2003 to reflect the use of new data from the West Coast groundfish observer program (WCGOP) on species location by depth, and

to reflect new allowable harvest levels for some overfished species, particularly bocaccio. As in 2003, RCA boundaries for 2004 differ by gear type to reflect the catchability of different overfished species by the various gear types. Although some of the recreational fisheries were managed by depth in 2003, recreational depth-based management will be expanded in 2004 to include seasonal RCAs for the recreational fisheries coastwide. RCAs for 2004 also differ by area of the coast to reflect the differing distributions of each overfished species population, such that northern area RCAs protect overfished species that have a more northerly distribution and southern area RCAs protect overfished species with a more southerly distribution. RCA boundaries will again be designated by a series of latitude/longitude coordinates intended to approximate specific depth contours.

On November 4, 2003 (68 FR 62374,) NMFS published a final rule to implement a vessel monitoring system (VMS) program to monitor vessel activities in and around the RCAs. This rule became effective on January 1, 2004, requiring all limited entry vessels participating in the West Coast groundfish fishery to carry and activate VMS units. For more information on the VMS requirements, visit our website at <http://www.nwr.noaa.gov/1sustfsh/groundfish/VMS/index.html> or call the contact names above. During 2004, NMFS and the Council will explore expanding coverage of the VMS program to open access fisheries and to charter boats in the recreational sector. As of March 1, 2004, limited entry fixed gear vessels, like trawl vessels, are prohibited from drifting within the RCAs. When a limited entry fixed gear vessel is within an RCA, it must be continuously transiting through the RCA.

Continuing in 2004, the commercial groundfish fishery will be managed with separate landing limits for limited entry trawl vessels, limited entry fixed gear (longline and pot) vessels, and open access vessels. The open access fishery includes all groundfish gear except for pot or longline gear fished by a vessel that has a limited entry permit endorsed for that gear, or groundfish trawl. Although groundfish trawl is not legal gear in the open access fishery, groundfish may be taken by shrimp, prawn, California halibut, or sea cucumber trawl gear under certain conditions. These non-groundfish trawl gear are considered exempted trawl gear, and have separate landing limits for some groundfish species from the rest of the open access fishery (see "Commercial Fishery: Non-groundfish Exempted Trawl Gear" below). Additionally, new recreational fisheries limits are introduced for 2004 (see "Recreational Fisheries" below).

Also continuing in 2004 are groundfish conservation areas, any closed area intended to protect a particular groundfish species or species group or species complex, include three different types of closed areas: the rockfish conservation areas (RCAs), the yelloweye rockfish conservation area (YRCA), and the cowcod conservation areas (CCAs). The RCAs, a depth-based management measure, continue to apply to all gears and sectors of the groundfish fishery, including the recreational sector. For the commercial fisheries, there is both a trawl RCA and a non-trawl RCA depending on the gear type being used. Boundaries for the RCAs will be referred to as either the "eastern boundary," meaning the RCA boundary that is closest to shore, or the "western boundary," meaning the RCA boundary that is farthest offshore. Generally, fishing is permitted either shoreward or seaward of the RCA.

The RCA boundaries are generally defined by straight lines drawn between specific latitude and longitude coordinates that approximate depth contours. The coordinates approximating the RCA boundaries for the remainder of 2004 are included at the end of this public notice and are available on our website at <http://www.nwr.noaa.gov/1sustfsh/groundfish/gConservAreas/> or by calling the contact names at the top of this public notice. These coordinates or RCA boundaries may change during the year. Any changes in the coordinates or RCA boundaries would be published in the *Federal Register* as

an inseason action or correction, and a public notice would be sent out to the fleet and posted on our website. All of these boundaries, except the 10 fm depth contour around the Farallon islands and the 20 fm depth contour in the CCAs in southern California, are specifically defined in the final rule, using latitude/longitude coordinates. A header in the trip limit tables (Tables 3-5) generally describes the commercial RCAs, including closures around islands. The commercial fishery is also subject to the CCA restrictions described in the section titled “Commercial Fisheries” below. For the recreational fishery, RCA, CCA, YRCA and Cordell Banks restrictions are described in the section titled “Recreational Fisheries” below.

The Cowcod Conservation Areas (CCAs) are a mandatory closed area in Southern California defined by coordinates that are fixed throughout the year. The specific

- (1) The Western CCA is an area south of Point Conception that is bound by straight lines connecting all of the following points in the order listed:

Trip Limit Tables

The trip limit tables for 2004 are structured the same as in 2003. Each trip limit table (Limited Entry Trawl, Limited Entry Fixed Gear and Open Access) is separated into a North and South table. For instance, there is Table 3 (North) for limited entry trawl trip limits north of 40°10' N. lat. to the US/Canada border and Table 3 (South) for limited entry trawl trip limits south of 40°10' N. lat. to the US/Mexico border. At the top of each table, the depth-based management restrictions for the appropriate gear type and area are included. The trip limit tables included in this public notice are subject to change during the year. Any changes in the trip limits would be published in the *Federal Register* as an inseason action, and a public notice would be sent out to the fleet and posted on our website.

Time and Area Closures

There are several closed times and areas described in the trip limit tables below. “Closure” when referring to closure of a fishery, means that taking and retaining, possessing, or landing the particular species or species group is prohibited. (See also 50 CFR 660.302.) Offloading must begin before the time the fishery closes. A header in the trip limit tables (Tables 3-5) generally describes the commercial RCAs, including closures around islands. During January 1 - December 31, commercial fishing is prohibited within the CCAs, except that commercial fishing for rockfish and lingcod is permitted shoreward of the 20-fm depth contour. It is unlawful to take and retain, possess, or land groundfish within the CCAs, except for species stated in this section, when those waters are open to fishing. Commercial fishing vessels may transit through the Western CCA with their gear stowed and groundfish on board only in a corridor through the Western CCA bounded on the north by the latitude line at 33°00'30" N. lat., and bounded on the south by the latitude line at 32°59'30" N. lat. The YRCA is designated as a voluntary closure for the limited entry fixed gear sablefish fleet and salmon trollers.

Minor Rockfish

Minor rockfish are those species without species-specific limits. Minor rockfish species are divided into three separate landing limit groups: nearshore, shelf, and slope. The rockfish species in each species group are listed in the table titled “Minor Rockfish Species” below. Black, darkblotched and yelloweye rockfish must be sorted separately from other minor rockfish species and identified on fish tickets.

Sorting Requirements

It is unlawful for any person to “fail to sort, prior to the first weighing after offloading, those groundfish species or species groups for which there is a trip limit, size limit, quota, or commercial optimum yield (OY), if the vessel fished or landed in an area during a time when such trip limit, size limit, commercial OY, or quota applied.” The States of Washington, Oregon, and California may also require that vessels record their landings as sorted on their state fish tickets. This provision applies to both the limited entry and open access fisheries. The following species must be sorted in 2004:

For vessels with a limited entry permit:

- *Coastwide* – widow rockfish, canary rockfish, darkblotched rockfish, yelloweye rockfish, shortbelly rockfish, black rockfish, minor nearshore rockfish, minor shelf rockfish, minor slope rockfish, shortspine and longspine thornyhead, Dover sole, arrowtooth flounder, rex sole, petrale sole, arrowtooth flounder, other flatfish, lingcod, sablefish, and Pacific whiting [Note: Although

black rockfish, yelloweye rockfish, and darkblotched rockfish are considered minor rockfish managed under the minor shelf and minor slope rockfish complexes, respectively, they have separate OYs and therefore must be sorted by species.]

- *North of 40°10' N. lat.* – POP, yellowtail rockfish, and, for fixed gear, blue rockfish;
- *South of 40°10' N. lat.* – minor shallow nearshore rockfish, minor deeper nearshore rockfish, California scorpionfish, chilipepper rockfish, bocaccio rockfish, splitnose rockfish, and Pacific sanddabs.

For open access vessels (vessels without a limited entry permit):

- *Coastwide*—widow rockfish, canary rockfish, darkblotched rockfish, yelloweye rockfish, black rockfish, minor nearshore rockfish, minor shelf rockfish, minor slope rockfish, Dover sole, arrowtooth flounder, petrale sole, rex sole, other flatfish, lingcod, sablefish, Pacific whiting, and Pacific sanddabs;
- *North of 40°10' N. lat.*—blue rockfish, POP, yellowtail rockfish;
- *South of 40°10' N. lat.*—minor shallow nearshore rockfish, minor deeper nearshore rockfish, chilipepper rockfish, bocaccio rockfish, splitnose rockfish;
- *South of Point Conception, CA (34°27' N. lat.)*--thornyheads.

Fishing in Areas with Different Landing Limits for the Same Species

Landings limits for a species or species complex may differ with different north-south geographic areas along the coast. The following “crossover” provisions apply to all vessels (limited entry and open access) operating in different geographic areas that have different cumulative or “per trip” limits for the same species, except for species subject only to daily trip limits coastwide and trip limits for black rockfish off Washington State.

If a vessel takes and retains any groundfish species or species group of groundfish in an area where a more restrictive trip limit applies, before fishing in an area where a more liberal trip limit (or no trip limit) applies, then that vessel is subject to the more restrictive trip limit for the entire period to which that trip limit applies, no matter where the fish are taken and retained, possessed, or landed. If a vessel takes and retains a groundfish species or species group in an area where a higher trip limit (or no trip limit applies) and takes and retains, possesses or lands the same species or species group in an area where a more restrictive trip limit applies, then that vessel is subject to the more restrictive trip limit for the entire period to which that trip limit applies, no matter where the fish are taken and retained, possessed, or landed.

Vessels operating in the limited entry trawl fishery are subject to these crossover provisions when making landings that include any one of the four species in the “DTS complex” or any of the species in the flatfish complex. (See limited entry trawl trip limit tables below.) There are several rockfish species (splitnose, chilipepper, bocaccio, yellowtail, POP, yelloweye) that are part of a minor rockfish group in one management area, but which have species-specific limits in another management area. Landings of those species are included in the minor rockfish species group when those landings are made in the area where the species is considered a minor rockfish.

Limited Entry Trawl Gear

The limited entry trawl trip limit tables below, Table 3 (North) and Table 3 (South), describe limits for three different types of limited entry trawl gear (large footrope gear, small footrope gear, and midwater gear). Large footrope trawl gear is bottom trawl gear with a footrope diameter larger than 8 inches

(including rollers, bobbins or other material encircling or tied along the length of the footrope). Small footrope trawl gear is bottom trawl gear with a footrope diameter 8 inches or smaller (including rollers, bobbins or other material encircling or tied along the length of the footrope). Chafing gear may be used only on the last 50 meshes of a small footrope trawl, measured from the terminal (closed) end of the codend. Other lines or ropes that run parallel to the footrope may not be augmented or modified to violate footrope size restrictions. The presence of rollers or bobbins larger than 8 inches in diameter on board the vessel, even if not attached to a trawl, will be considered to mean a large footrope is on board. Midwater trawl gear is pelagic trawl gear. The footrope of midwater trawl gear may not be enlarged or weighted by encircling it with chains or by any other means. Ropes or lines running parallel to the footrope of midwater trawl gear must be bare and may not be suspended with chains or other materials.

A vessel may have more than one type of limited entry bottom trawl gear on board, but the most restrictive trip limit associated with the gear on board applies for that trip and will count toward the cumulative trip limit for that gear. For example, if a vessel has large footrope gear on board, it cannot land yellowtail rockfish, even if the yellowtail rockfish is caught with a small footrope trawl. A vessel that is trawling within a GCA with trawl gear authorized for use within a GCA may not have any other type of trawl gear on board.

Trawl vessels may transit through the trawl RCA, with or without groundfish on board, provided all groundfish trawl gear is stowed either: (1) below deck; or (2) if the gear cannot readily be moved, in a secured and covered manner, detached from all towing lines, so that it is rendered unusable for fishing; or (3) remaining on deck uncovered if the trawl doors are hung from their stanchions and the net is disconnected from the doors.

If a vessel fishes in the trawl RCA, it may not participate in any fishing on that trip that is prohibited by the restrictions that apply within the trawl RCA. For example, if a vessel participates in the pink shrimp fishery within the RCA, the vessel cannot on the same trip participate in the DTS fishery outside of the RCA. Nothing in these Federal regulations supercede any state regulations that may prohibit trawling shoreward of the 3-nm state waters boundary line.

Non-groundfish Exempted Trawl Gear (open access)

For 2004, the trip limits for groundfish taken with exempted trawl gear by vessels engaged in fishing for pink shrimp, ridgeback prawns, California halibut, or sea cucumbers are included at the bottom of the open access trip limit tables, Table 5 (North) and Table 5 (South) (see below). For the exempted trawl gear fisheries, the trawl RCA, if applicable, is detailed in the exempted trawl gear sections at the bottom of Table 5 (North) and Table 5 (South). Retention of groundfish caught by exempted trawl gear is prohibited in the designated RCAs, except that pink shrimp trawl may retain groundfish caught both shoreward and seaward of the trawl RCA subject to the limits in Table 5 (North) and Table 5 (South). If a vessel fishes in the trawl RCA, it may not participate in any fishing on that trip that is prohibited by the restrictions that apply within the trawl RCA. For example, if a vessel participates in the pink shrimp fishery within the RCA, the vessel cannot on the same trip participate in the DTS fishery outside of the RCA. Nothing in these Federal regulations supercede any state regulations that may prohibit trawling shoreward of the 3-nm state waters boundary line.

In addition to the groundfish trip limits for exempted trawl fisheries at the bottom of the open access tables, the other trip limits in the open access tables also apply. A vessel that takes and retains pink shrimp and also takes and retains groundfish in either the limited entry or open access fishery during the

same applicable cumulative limit period that it takes and retains pink shrimp (which may be 1 month or 2 months, depending on the fishery and the time of year), may retain the larger of the 2 limits, but only if the limit(s) for each gear or fishery are not exceeded when operating in that fishery or with that gear. The limits are not additive; the vessel may not retain a separate trip limit for each fishery.

Limited Entry Fixed Gear Primary Sablefish Fishery

To take, retain, possess, or land sablefish during the primary season for the limited entry fixed gear sablefish fishery, the owner of a vessel must hold a limited entry permit for that vessel, affixed with both a gear endorsement for longline or trap (or pot) gear, and a sablefish endorsement (see 50 CFR 660.323(a)(2)(i).) A sablefish endorsement is not required to participate in the limited entry daily trip limit fishery. The primary season begins at 12 noon l.t. on April 1, 2004, and ends at 12 noon l.t. on October 31, 2004. There are no pre-season or post-season closures. During the primary season, each vessel with at least one limited entry permit with a sablefish endorsement that is registered for use with that vessel may land up to the cumulative trip limit for each of the sablefish-endorsed limited entry permits registered for use with that vessel, for the tier(s) to which the permit(s) are assigned. For 2004, the following limits are in effect: **Tier 1, 62,000 lb (28,123 kg); Tier 2, 28,000 lb (12,701 kg); Tier 3, 16,000 lb (7,257 kg).** [Note: These tier limits may change as new observer data is released in the spring of 2004. Limits will be finalized before the start of the primary season.] All limits are in round weight. If a vessel is registered for use with a sablefish-endorsed limited entry permit, all sablefish taken after April 1, 2004, count against the cumulative limits associated with the permit(s) registered for use with that vessel. A vessel that is eligible to participate in the primary sablefish season may participate in the daily trip limit fishery for sablefish once that vessel's primary season sablefish limit(s) have been taken, or after October 31, 2004, whichever occurs first. No vessel may land sablefish against both its primary season cumulative sablefish limits and against the daily trip limit fishery limits within the same 24 hour period of 0001 hour l.t. to 2400 hours l.t. If a vessel has taken all of its tier limit except for an amount that is smaller than the daily trip limit amount, that vessel's subsequent sablefish landings are automatically subject to daily and/or weekly trip limits.

Open Access Fisheries

Vessels participating in the open access fisheries that are targeting species other than groundfish may fish in the RCA but may not retain groundfish caught within the RCA nor groundfish caught outside of the RCA boundaries on the same fishing trip.

Black Rockfish

The trip limit for black rockfish (Sebastes melanops) for commercial fishing vessels using hook-and-line gear between the U.S.-Canada border and Cape Alava, WA (48°09'30" N. lat.) and between Destruction Island, WA (47°40'00" N. lat.) and Leadbetter Point, WA (46°38'10" N. lat.), is 100 lb (45 kg) or 30 percent, by weight of all fish on board, whichever is greater, per vessel per fishing trip. These "per trip" limits apply to limited entry and open access fisheries, in conjunction with the cumulative trip limits and other management measures listed in Tables 4 (North) and Table 5 (North). The crossover provisions do not apply to the black rockfish per-trip limits.

1/ Gear requirements and prohibitions are explained above. See IV. A.(14).

2/ "North" means 40°10' N. lat. to the U.S.-Canada border. 40°10' N. lat. is about 20 nm south of Cape Mendocino, CA.

3/ Bocaccio and chilipepper are included in the trip limits for minor shelf rockfish and splitnose rockfish is included in the trip limits for minor slope rockfish.

4/ "Other" flatfish means all flatfish at 50 CFR 660.302 except those in this Table 3 with species specific management measures, including trip limits.

5/ The whiting "per trip" limit in the Eureka area shoreward of 100 fm is 10,000 lb/ trip all year. Outside Eureka area, the 20,000 lb/ trip limit applies. See IV. B.(3).

6/ Closed means that it is prohibited to take and retain, possess, or land the designated species in the time or area indicated. See IV. A.(7).

7/ Small footrope trawl means a bottom trawl net with a footrope no larger than 8 inches (20 cm) in diameter.

8/ The minimum size limit for lingcod is 24 inches (61 cm) total length.

9/ Other fish are defined at 50 CFR 660.302, as those groundfish species or species groups for which there is no trip limit, size limit, quota, or harvest guideline.

10/ The "Rockfish Conservation Area" is a gear and/or sector specific closed area generally described by depth contours but specifically defined by lat/long coordinates set out at IV. A.(17)(f), that may vary seasonally.

11/ The "modified 200 fm" line is modified to exclude certain petrale sole areas from the RCA.

Small footrope or midwater trawl gear is required shoreward of the RCA; all trawl gear (large footrope, midwater trawl, and small footrope gear) is permitted seaward of the RCA.						
A vessel may have more than one type of limited entry bottom trawl gear on board, but the most restrictive trip limit associated with the gear on board applies for that trip and will count toward the cumulative trip limit for that gear. A vessel may not have limited entry bottom trawl gear on board if that vessel also has trawl gear on board that is permitted for use within a RCA, including limited entry midwater trawl gear, regardless of whether the vessel is intending to fish within a RCA on that fishing trip. See IV.A.(14)(iv) for details.

17 PINK SHRIMP EXEMPTED TRAWL (not subject to RCAs)						
18 North	Effective April 1 - October 31, 2004: groundfish 500 lb/day, multiplied by the number of days of the trip, not to exceed 1,500 lb/trip. The following sublimits also apply and are counted toward the overall 500 lb/day and 1,500 lb/trip groundfish limits: lingcod 300 lb/month (minimum 24 inch size limit); sablefish 2,000 lb/month; canary, thornyheads and yelloweye rockfish are PROHIBITED. All other groundfish species taken are managed under the overall 500 lb/day and 1,500 lb/trip groundfish limits. Landings of these species count toward the per day and per trip groundfish limits and do not have species-specific limits. The amount of groundfish landed may not exceed the amount of pink shrimp landed.					
19 SALMON TROLL						
20 North	Salmon trollers may retain and land up to 1 lb of yellowtail rockfish for every 2 lbs of salmon landed, with a cumulative limit of 200 lb/month, both within and outside of the RCA. This limit is within the 200 lb per month combined limit for minor shelf rockfish, widow rockfish and yellowtail rockfish, and not in addition to that limit. All groundfish species are subject to the open access limits, seasons and RCA restrictions listed in the table above.

The following sublimits also apply and are counted toward the overall 500 lb/day and 1,500 lb/trip groundfish limits: lingcod 300 lb/month (minimum 24 inch size limit); sablefish 2,000 lb/ month; canary, thornyheads and yelloweye rockfish are PROHIBITED. All other groundfish species taken are managed under the overall 500 lb/day and 1,500 lb/trip groundfish limits. Landings of these species count toward the per day and per trip groundfish limits and do not have species-specific limits. The amount of groundfish landed may not exceed the amount of pink shrimp landed.

42		Groundfish 300 lb/trip. Trip limits in this table also apply and are counted toward the 300 lb groundfish per trip limit. The amount of groundfish landed may not exceed the amount of the target species landed, except that the amount of spiny dogfish landed may exceed the amount of target species landed. Spiny dogfish are limited by the 300 lb/trip overall groundfish limit. The daily trip limits for sablefish coastwide and thornyheads south of Pt. Conception and the overall groundfish "per trip" limit may not be multiplied by the number of days of the trip. Vessels participating in the California halibut fishery south of 38°57'30" N. lat. are allowed to (1) land up to 100 lb/day of groundfish without the ratio requirement, provided that at least one California halibut is landed and (2) land up to 3,000 lb/month of flatfish, no more than 300 lb of which may be species other than Pacific sanddabs, sand sole, starry flounder, rock sole, curfin sole, or California scorpionfish (California scorpionfish is also subject to the trip limits and closures in line 33).			

1/ "South" means 40°10' N. lat. to the U.S.-Mexico border. 40°10' N. lat. is about 20 nm south of Cape Mendocino, CA.

2/ Yellowtail rockfish is included in the trip limits for minor shelf rockfish and POP is included in the trip limits for minor slope rockfish.

3/ "Other flatfish" means all flatfish at 50 CFR 660.302 except those in this Table 5 with species specific management measures, including trip limits.

4/ The size limit for lingcod is 24 inches (61 cm) total length.

5/ Closed means that it is prohibited to take and retain, possess, or land the designated species in the time or area indicated. See IV. A.(7).

6/ Other fish are defined at 50 CFR 660.302, as those groundfish species or species groups for which there is no trip limit, size limit, quota, or harvest guideline.

7/ The "Rockfish Conservation Area" is a gear and/or sector specific closed area generally described by depth contours, but specifically defined by lat./long. coordinates set out at IV. A.(17)(f), that may vary seasonally.

To convert pounds to kilograms, divide by 2.20462, the number of pounds in one kilogram.

Recreational Fishery

Washington Recreational Regulations

For each person engaged in recreational fishing seaward of Washington, the groundfish bag limit is 15 groundfish, including rockfish and lingcod, and is open year-round (except for lingcod). The following sublimits and closed areas apply:

Closed Areas—

Yelloweye Rockfish Conservation Area— The Yelloweye Rockfish Conservation Area, or YRCA, is a “C-shaped” area which is closed to recreational groundfish and halibut fishing. The YRCA is defined by latitude and longitude coordinates specified at 50 CFR 660.304(d) and provided above in the “Overview” section of this public notice.

Recreational Rockfish Conservation Area— The recreational Rockfish Conservation Area, or recreational RCA, is an area which may be closed to recreational groundfish fishing inseason. If recreational fishing for all groundfish is prohibited seaward of a boundary line approximating the 30-fm depth contour, a notice will be published in the *Federal Register* inseason. Coordinates for the boundary line approximating the 30-fm depth contour are listed below in the coordinates section.

Rockfish— In areas seaward of Washington that are open to recreational groundfish fishing, there is a 10 rockfish per day bag limit. Taking and retaining canary rockfish and yelloweye rockfish is prohibited.

Lingcod— Recreational fishing for lingcod is closed between January 1 and March 12, and between October 17 and December 31. In areas seaward of Washington that are open to recreational groundfish fishing and when the recreational season for lingcod is open (i.e., between March 13–October 16), there is a bag limit of 2 lingcod per day, which may be no smaller than 24 in (61 cm) total length.

Oregon Recreational Regulations

Recreational fishing for groundfish is open from January 1 through December 31 in all areas, except that from June 1 through September 30, recreational fishing for groundfish is prohibited seaward of a recreational RCA boundary line approximating the 40-fm depth contour. Coordinates for the boundary line approximating the 40-fm depth contour are listed below in the coordinates section. Recreational fishing for all groundfish may be prohibited inseason seaward of a boundary line approximating the 30-fm depth contour. If a boundary line approximating the 30-fm depth contour is implemented inseason, a document will be published in the *Federal Register*.

Bag Limits, Size Limits- The bag limits for each person engaged in recreational fishing seaward of Oregon are 2 lingcod per day, which may be no smaller than 24 in total length; and 10 marine fish per day, which excludes salmon, tuna, perch species, sturgeon, sanddabs, lingcod, striped bass and baitfish (herring, smelt, anchovies and sardines), but which includes rockfish, greenling, cabezon and other groundfish species. The minimum size limit for cabezon retained in the recreational fishery is 16 in and for greenling is 10 in. Taking and retaining canary rockfish and yelloweye rockfish is prohibited.

California Recreational Regulations

Seaward of California (north and south of 40°10' N. lat.), California law provides that, in times and areas when the recreational fishery is open, there is a 20-fish bag limit for all species of finfish, within which no more than 10 fish of any one species may be taken or possessed by any one person. Retention of cowcod, yelloweye rockfish and canary rockfish is prohibited in California's recreational fishery all year in all areas.

North of 40°10' N. lat.— For each person engaged in recreational fishing seaward of California north of 40°10' N. lat. to the California/Oregon border, the following seasons, bag limits, and size limits apply:

RCG Complex— The California rockfish, cabezon, greenling complex (RCG Complex), as defined in State regulations (Section 1.91, Title 14, California Code of Regulations), includes all rockfish, kelp greenling, rock greenling, and cabezon. This category does not include California scorpionfish, also known as “sculpin.”

Seasons. North of 40°10' N. lat., recreational fishing for the RCG Complex is open from January 1 through December 31.

Bag limits, boat limits, hook limits. North of 40°10' N. lat., in times and areas when the recreational season for the RCG Complex is open, there is a limit of two hooks and one line when fishing for rockfish, and the bag limit is 10 rockfish per day, of which no more than 2 may be bocaccio. The following daily bag limits also apply: no more than 10 cabezon per day and no more than 10 kelp greenling and 10 rock greenling per day. Multi-day limits are authorized by a valid permit issued by California and must not exceed the daily limit multiplied by the number of days in the fishing trip.

Size limits. The following size limits apply: bocaccio may be no smaller than 10 in total length; cabezon may be no smaller than 15 in total length; and kelp and rock greenling may be no smaller than 12 in total length.

Dressing/Filleting. Cabezon, kelp greenling, and rock greenling taken in the recreational fishery may not be filleted at sea. Rockfish skin may not be removed when filleting or otherwise dressing rockfish taken in the recreational fishery. The following rockfish filet size limits apply: bocaccio filets may be no smaller than 5 in and brown-skinned rockfish fillets may be no smaller than 6.5 in. “Brown-skinned” rockfish include the following species: brown, calico, copper, gopher, kelp, olive, speckled, squarespot, and yellowtail.

Lingcod—

Seasons. North of 40°10' N. lat., recreational fishing for lingcod is open from January 1 through December 31.

Bag limits, boat limits, hook limits. North of 40°10' N. lat., in times and areas when the recreational season for lingcod is open, there is a limit of two hooks and one line when fishing for lingcod. The bag limit is two lingcod per day from January 1 through March 31 and one lingcod per day from April 1 through December 31. Multi-day limits are authorized by a valid permit issued by California and must not exceed the daily limit multiplied by the number of days in the fishing trip.

Size limits. Lingcod may be no smaller than 24 in. total length from January 1 through March 31 and no smaller than 30 in. total length from April 1 through December 31.

Dressing/Fileting. Lingcod filets may be no smaller than 16 in. in length from January 1 through March 31 and no smaller than 21 in. in length from April 1 through December 31.

South of 40°10' N. lat.— For each person engaged in recreational fishing seaward of California

south of 40°10' N. lat., the following seasons, bag limits, size limits and closed areas apply:

Closed Areas—

Cowcod Conservation Areas— Coordinates defining the boundaries of the Cowcod Conservation Areas (CCAs) are described in Federal regulations at 50 CFR 660.304(c) and are provided above in the “Overview” section of this notice. Recreational fishing for all groundfish is prohibited within the CCAs, except that fishing for sanddabs is permitted subject to the provisions in the “sanddabs” section below and that fishing for species managed under this section (not including cowcod, canary, and yelloweye rockfish) are permitted in waters shoreward of the 20-fm depth contour within the CCAs from March 1 through December 31, subject to the bag limits in this section.

Recreational Rockfish Conservation Areas— The recreational Rockfish Conservation Areas, or recreational RCAs, are areas that are closed to recreational fishing for groundfish.

Between 40°10' N. lat. and 34°27' N. lat., recreational fishing for all groundfish, except sanddabs, is prohibited seaward of a boundary line approximating the 30-fm depth contour along the mainland coast and along islands and offshore seamounts during September 30 through December 31; is prohibited seaward of the 20-fm depth contour during May 1 through August 31; and is closed entirely during March 1 through April 30 (i.e., prohibited seaward of the shoreline). Coordinates for the boundary line approximating the 30-fm depth contour are listed below in the coordinates section. Under state law, recreational fishing for rockfish, lingcod, and associated species limited to cabezon, greenlings of the genus Hexagrammos, California scorpionfish, California sheephead, and ocean whitefish are prohibited between the shoreline and the 10-fm depth contour around the Farallon Islands. Recreational fishing for certain groundfish species is also prohibited in waters of the Cordell Banks, located at 38°02' N. lat. and 123°25' W. long., and within a 5 nautical mile radius around this point. This portion of the Cordell Banks is closed to fishing for rockfish, lingcod, cabezon, kelp greenlings and California scorpionfish. [[NOTE: California state regulations also prohibit the retention of other greenlings of the genus Hexagrammos, California sheephead and ocean whitefish.]

South of 34°27' N. lat., recreational fishing for all groundfish, except sanddabs, is prohibited seaward of a boundary line approximating the 60-fm depth contour along the mainland coast and along islands and offshore seamounts during March 1 through December 31, except in the CCA where fishing is prohibited seaward of the 20-fm depth contour as described above in this section. Coordinates for the boundary line approximating the 60-fm depth contour are listed below in the coordinates section.

RCG Complex— The California rockfish, cabezon, greenling complex (RCG Complex), as defined in State regulations (Section 1.91, Title 14, California Code of Regulations), includes all rockfish, kelp greenling, rock greenling, and cabezon. This category does not include California scorpionfish, also known as “sculpin.”

Seasons. Between 40°10' N. lat. and 34°27' N. lat., recreational fishing for the RCG Complex is open from May 1 through December 31 (i.e., it's closed from March 1 through April 30). South of 34°27' N. lat., recreational fishing for the RCG-Complex is open from March 1 through December 31. When recreational fishing for the RCG Complex is open, it is permitted only shoreward of the recreational RCA, as described above.

Bag limits, boat limits, hook limits. South of 40°10' N. lat., in times and areas when the recreational season for the RCG Complex is open, there is a limit of two hooks and one line when fishing for rockfish, and the bag limit is 10 RCG Complex fish per day (not including canary rockfish, yelloweye rockfish and cowcod, which are prohibited), of which up to 10 may be rockfish, no more

than 1 of which may be bocaccio and no more than 2 of which may be shallow nearshore rockfish. [Note: The shallow nearshore rockfish group off California are composed of kelp, grass, black-and-yellow, China, and gopher rockfishes.] Also within the 10 RCG Complex fish per day limit, no more than 2 fish per day may be greenling (kelp and/or other greenlings) and no more than 3 fish per day may be cabezon. Lingcod, California scorpionfish and sanddabs taken in recreational fisheries off California do not count toward the 10 RCG Complex fish per day bag limit. Multi-day limits are authorized by a valid permit issued by California and must not exceed the daily limit multiplied by the number of days in the fishing trip.

Size limits. The following size limits apply: bocaccio may be no smaller than 10 in total length, cabezon may be no smaller than 15 in, and kelp and other greenlings may be no smaller than 12 in.

Dressing/Filleting. Cabezon, kelp greenling, and rock greenling taken in the recreational fishery may not be filleted at sea. Rockfish skin may not be removed when filleting or otherwise dressing rockfish taken in the recreational fishery. The following rockfish filet size limits apply: bocaccio filets may be no smaller than 5 in and brown-skinned rockfish filets may be no smaller than 6.5 in. “Brown-skinned” rockfish include the following species: brown, calico, copper, gopher, kelp, olive, speckled, squarespot, and yellowtail.

California scorpionfish— California scorpionfish only occur south of 40°10' N. lat.

Seasons. Between 40°10' N. lat. and 34°27' N. lat., recreational fishing for California scorpionfish is open from May 1 through December 31 (i.e., it's closed from March 1 through April 30). South of 34°27' N. lat., recreational fishing for California scorpionfish is open from March 1 through April 31 and from November 1 through December 31 (i.e., it's closed from May 1 through October 31).

When recreational fishing for California scorpionfish is open, it is permitted only shoreward of the recreational RCA, as described above.

Bag limits, boat limits, hook limits. South of 40°10' N. lat., in times and areas where the recreational season for California scorpionfish is open, and the bag limit is 5 California scorpionfish per day. California scorpionfish do not count against the 10 RCG Complex fish per day limit. Multi-day limits are authorized by a valid permit issued by California and must not exceed the daily limit multiplied by the number of days in the fishing trip.

Size limits. California scorpionfish may be no smaller than 10 in total length.

Dressing/Filleting. California scorpionfish fillets may be no smaller than 5 in.

Lingcod

Seasons. Between 40°10' N. lat. and 34°27' N. lat., recreational fishing for lingcod is open from May 1 through December 31 (i.e., it's closed from March 1 through April 30). South of 34°27' N. lat., recreational fishing for lingcod is open from March 1 through December 31. When recreational fishing for lingcod is open, it is permitted only shoreward of the recreational RCA, as described above.

Bag limits, boat limits, hook limits. South of 40°10' N. lat., in times and areas when the recreational season for lingcod is open, there is a limit of two hooks and one line when fishing for lingcod. The bag limit is two lingcod per day from January 1 through March 31 and one lingcod per day from April 1 through December 31. Lingcod do not count against the 10-RCG Complex fish per day limit. Multi-day limits are authorized by a valid permit issued by California and must not exceed the daily limit multiplied by the number of days in the fishing trip.

Size limits. In times and areas when the recreational season for lingcod is open, lingcod may be no smaller than 24 in. total length from January 1 through March 31 and no smaller than 30 in. total length from April 1 through December 31.

Dressing/Filleting. In times and areas when the recreational season for lingcod is open, lingcod filets may be no smaller than 16 in. in length from January 1 through March 31 and no smaller than 21 in. in length from April 1 through December 31.

Sanddabs- South of 40°10' N. lat., recreational fishing for sanddabs is permitted both shoreward of and within the closed areas, as described above. Recreational fishing for sanddabs is permitted within the closed areas, subject to a limit of up to 12 hooks, "Number 2" or smaller, which measure 11 mm point to shank, and up to 2 lb of weight per line. There is no bag limit, season, or size limit for sanddabs, however, it is prohibited to fillet sanddabs at sea.

Additional Information

- A trip limit is the total allowable amount of a groundfish species or species complex, by weight, or by percentage of fish on board, that may be taken and retained, possessed, or landed per vessel from a single fishing trip. A daily trip limit is the maximum amount that may be taken and retained, possessed, or landed per vessel in 24 consecutive hours, starting at 0001 hours (local time). A cumulative trip limit is the maximum amount that may be taken and retained, possessed, or landed per vessel in a specific period of time, without a limit on the number of landing or trips.
- All limits are coastwide unless otherwise specified and in round weight or round weight equivalents. Percentages apply only to the round weight of legal fish on board unless otherwise specified.
- One metric ton is 2,204.6 lbs.
- For the purposes of the above limits, the following conversions apply. Sablefish: processed weight will be converted to round weight using the States' conversion factor of 1.6. Lingcod: 24 inches total length is equivalent to 19.5 inches headed, processed weight will be converted to round weight using 1.5 for headed-and-gutted lingcod, and 1.1 for gutted lingcod with the head on.
